File No. 65-15336-162

June 15, 1950

I, David Greenglass, having been informed of my constitutional right not to have a search made of the premises hereinafter mentioned without a search warrant and of my right to refuse to consent to such a search, hereby authorize

John H. Lewis, and
Leo W. Luntz, Special Agents of

the Federal Bureau of Investigation, United States Department of Justice, to conduct a complete search of my residence located at

Apt 6 265 Livingston St., NYC.

These agents are authorized by me to take from my residence any letters, papers, materials or other property which they may desire.

This written permission is being given by me to the above named Special Agents voluntarily and without threats or promises of any kind.

David Greenglass

I, David Greenglass, make the following statement to John W. Lewis and Leo H. Frutkin, who have identified themselves to me as Special Agents of the Federal Bureau of Investigation. I make this statement freely and voluntarily and have been advised of my right ^{not to make} ~~in making~~ a statement and that I have a right to an attorney. I understand that this statement may be used against me in a court of law. *D. G.*

I was born March 3, 1922, at New York City and presently reside at 265 Rivington Street, New York City.

On or about November 29, 1944, my wife, Ruth, arrived in New Mexico from New York City and told me that Julius Rosenberg, my brother-in-law, had asked if I would give information on the Atom Bomb and stated as a reason for that that we are at war with Germany and Japan and that they are the enemy and that Soviet Russia was fighting the enemy and was entitled to the information. On that day, I agreed to give whatever information came to me in the course of my employment at Los Alamos, New Mexico, at the Los Alamos Atom Bomb Project. This message, which my wife conveyed to me, was not her own idea but an idea given to her by Julius Rosenberg. She told me at the time that she would contact me later for information about the project.

25.

About February, 1945, my wife moved to Albuquerque, New Mexico, from New York City. Three or four months later she had a miscarriage. Approximately a month after that time, a man came to the place where Ruth was living, 209 North High Street, Albuquerque, New Mexico. I did not know this man's name at the time but recently recognized his pictures in various newspapers as being Harry Gold. He had with him a torn ^{or cut} piece of paper card which fitted a torn piece of paper card furnished me as a means of identifying this man. I cannot recall at this time whether this torn piece of card was given to me by my wife, Ruth, at the time she moved to Albuquerque, New Mexico, from New York about February, 1945, or whether I received it from Julius Rosenberg while I was in New York City on furlough between about December 20, 1944, and January 20, 1945. ^{Sold} He gave me an envelope containing \$500. Gold said to me that I was living in a poor place at the time he gave me the \$500. I furnished him with information concerning the Los Alamos Project, although I did not do it for the promise of money. I gave him a list of names of persons ^{Sold} are working at Los Alamos who, I thought, could be approached for information. They were names of both soldiers and civilians, to the best of my recollection. I felt it was gross negligence on the part of the Unit to give Russia the information about the Atom Bomb because she was

I think that I gave Gold or something of that type effects on a steel target

a high explosive lens mold, to study implosion wave on uranium so

enclosed

it could be determined how they could arrive at a critical mass that would not explode before detonation.

I have furnished a rough penciled sketch of a portion of the above-mentioned high-explosive implosion test to F.B.I. Agents.

I also furnished Gold with information concerning the identity of a world-famous scientist, who ^{was} ~~is~~ working at Los Alamos under an assumed name. *D.S.*

I also furnished the information to Gold that Oppenheimer was working at Los Alamos and that Kistiakowsky was working at Los Alamos.

Gold told me that he would come back to see me again and I agreed to see him; however, he never contacted me again.

My wife was not in the room at the time I received the money from Gold and at the time I gave him information about the Los Alamos Atom Bomb Project.

I gave Gold the information without expecting money for it. D.S.

I was inducted into the Army April 12, 1943, and was given Army Serial Number 32882473. During the summer of 1944 I was assigned to Oak Ridge, Tennessee, where I remained for about two weeks. While at Oak Ridge, Tennessee, I was given a security pep talk by someone in Military Intelligence, and at Los Alamos was furnished with a security check. I understood that all of the work being done at Los Alamos, New Mexico, was top secret. I understand that under Army regulations top secret information is not to be discussed with any employees, except when it is necessary for the work on the Atom Bomb Project from about August 1944 and during all that time I was a non-commissioned member of the Army, having

nglass

first, Grade T-5, and later, Grade T-4. I was assigned to Theta Shop at Los Alamos where I worked on high-speed cameras, lucite parts, experimental equipment, and also made up parts that could not be bought on the outside. On one occasion that I recall I handled uranium. In general, the work was in regard to the Atom Bomb but I did not know this until about a month or two after I was assigned there. I heard it among the employees at the Los Alamos Project.

I recall that I had a leave of five days in late November, 1944, and that my wife, who had arrived in Albuquerque for my wedding anniversary celebration, came on or about November 29, 1944. I also recall that I had a furlough from about December 30, 1944, to about January 20, 1945, and I spent my furlough time in New York City.

*I have read the above statement consisting
of this page and three preceding pages
and state the truth to the
best of my knowledge. No promises or
threats of any kind were
used in the making of this statement.*

I was inducted into the Army April 12, 1943, and was given Army Serial Number 32882473. During the summer of 1944 I was assigned to Oak Ridge, Tennessee, where I remained for about two weeks. While at Oak Ridge, Tennessee, I was given a security pep talk by some ^{one in Military Intelligence,} and at Los Alamos was furnished with a security ^{clearance} of the work being done at Los Alamos, New Mexico, ^{I understood that all} stand that under Army regulations "top secret" ^{information} is not to be discussed with anyone even with fellow ^{officers} it is necessary for the work. I was assigned to Project from about August, 1944, until about ^{that} time I was a non-commissioned officer.

first, Grade T-5, and later, Grade T-4. I was assigned to Theta Shop at Los Alamos where I worked on high-speed cameras, incite parts, experimental equipment, and also made up parts that could not be bought on the outside. On one occasion that I recall I handled uranium. In general, the work was in regard to the Atom Bomb but I did not know this until about a month or two after I was assigned there. I heard it among the employees at the Los Alamos Project.

I recall that I had a leave of five days in late November, 1944, and that my wife, who had arrived in Albuquerque for my wedding anniversary celebration, came on or about November 29, 1944. I also recall that I had a furlough from about December 30, 1944, to about January 20, 1945, and I spent my furlough time in New York City.

Les H. Prutkin
Special Agent

New York N.Y.
July 19, 1950

I, David Greenglass, make the following statement to John H. Lewis and John A. Harrington whom I know to be special agents of the Federal Bureau of Investigation. I understand that I am not required to make a statement and that this statement may be used against me in a court of law. I have been advised of my right to an attorney. I make this statement of my own free will and no threats or promises have been made to me to get me to make this statement.

I recall that when Ruth came to see me at Albuquerque New Mexico to spend our second wedding anniversary together on November 29, 1944, that she and I stayed at the El Fidel Hotel. After a few days we

D.G.
David Greenglass

took a walk on Route 66 beyond the city limits. At that time Ruth told me of a conversation between her and Julius Rosenberg and Ethel Rosenberg which took place at the Rosenbergs' apartment at 10 Monroe Street, New York City in early November, 1944. This conversation she said was as follows: Julius told Ruth in effect that he was gathering information for the Russians, and that he wanted me to give information concerning the work I was then doing at Los Alamos N. M.

Julius said that I was working on the atom bomb. Ruth said she told Julius that she did not to ask me to do what asked. At that point she at my sister Ethel Rosenberg well at least ask David's. Ruth said she was -

reluctant to agree to this, but that Julius and Ethel Rosenberg finally persuaded her that she should at least tell me what Julius wanted me to do.

I then told Ruth that I was shocked. This was the first information I had received that I was working on the atom bomb, however I did not tell this to Ruth. I said to Ruth I know that I am working on the atom bomb. Then I said no, I won't give Julius the information. The next day I changed my mind and told Ruth to tell Julius that would furnish him the information.

Then I told Ruth to tell Julius that the ~~was~~ following information: I described the proximate amount of the solution at Los Alamos, the

3. David Greenglass

approximate size of the project,
and the names of some of
the personnel working there.
I think I mentioned the name
of Oppenheimer and Vrey as
connected with the project.

In ^{the} first week of January
1945 while I was at home
in New York City on furlough,
my wife and I visited Julius
and Ethel Rosenberg at 10
Monroe St. New York City, N. Y.
At that time I was introduced
by Julius to Anne, who Julius
said was Mike's wife. I knew
that Julius was referring to
Mike Sidorovich whom I had
previously known at Brooklyn.

The five of us talked
while and then Anne left.
After that Anne put on
and when she got to
she turned around

and I said for her to remember me to Mike.

After Anne left Ruth and I and Julius and Ethel had dinner together and spent the rest of the evening in the apartment. After dinner we sat around and talked and Julius asked me what I was doing at Los Alamos. I explained to him that someone would bring me a sketch or drawing and that I would make parts in the machine shop where I was working and sometimes that I would make changes so that it would function properly. He asked me how the atom bomb was detonated. I did not know at that time and so advised

then told me what
me to get in the
5 David Greenglass

way of information for him
from the Los Alamos project.
He gave me a general description
of how the ^{marvel} atom bomb works.
Julius cautioned me against
sticking out my neck in
getting the information for him
and said I should be very
careful not to be obvious.
My wife and Ethel were listening
to the conversation between
Julius and myself and were
also talking between themselves.
Toward the end of the evening
& before we left Julius' ap-
artment, Julius got out the
box of a Jello box. While Ruth,
Ethel & I watched, Julius cut
the Jello box into two
with a pair of scissors.
He cut about half way
perpendicularly and then
the rest of the cut at
6. David Greenglass

about a 45 degree angle. He handed me the portion with the pointed edge.

Julius then said that Anne would be given the other portion of the side of the Jello box. He then said that Anne would meet either Ruth or me in front of one of the main theaters in Denver Colorado at such time as I would have information that he wanted about the Los Alamos atom bomb project. I received the impression that arrangements were tentative, & that Anne had been that night so she could identify & we could recognize her.

I the above statement consisting of all preceding pages. It is to the best of my knowledge

David Greenglass

August 16, 1950

I, David Greenglass, make the following voluntary statement to Special Agent Leo H. Friedman of the Federal Bureau of Investigation. No promises or threats have been made to me to obtain this statement. I know that I do not have to make any statement and that any statement I make can be used against me in a Court of Law. I know that I have the right to consult my attorney in my own behalf.

I recall that in September 1945 when I was in New York City on furlough I saw Julius Rosenberg, my brother-in-law. At that time I gave him ^{information} relating to the atomic bomb. With that information, I now recall, that I also gave him in writing a description of an experiment, then being conducted at Los Alamos, N. M., which was concerned with the reduction of the amount of plutonium to be used in the atomic bomb. This experiment, I informed Julius Rosenberg, consisted of one sphere of uranium inside of a larger sphere of uranium with a large air gap between the two spheres and stilts to hold the inner sphere apart from the outer sphere. I informed Rosenberg that

8/16/50 David Greenglass

the air gag was used to increase the speed with which the outer sphere is implored. I told him this would result in a greater explosion with the use of less plutonium. I recall that I made my portion of this experiment as one of my duties at Los Alamos.

I've read the foregoing statement consisting of this page and one preceding page, and state it is the truth to the best of my recollection.

8/16/50

JULY
~~JULY~~ 17, 1950 D.D.
New York, New York

I, David Greenglass, make the following statement to John W. Lewis and Leo H. Frutkin who have identified themselves to me as Special Agents of the Federal Bureau of Investigation. I make this statement freely and voluntarily and I have been advised of my right not to make a statement. I have also been advised of my right to an attorney. No promises or threats have been made to me to get me to make this statement. I understand that this statement may be used against me in a court of law.

I was born March 3, 1922 at New York City and my home is now at 265 Rivington Street, New York City, New York. I was inducted into the United States Army April 12, 1943 and was given Army Serial Number 32882473 and was discharged from the army February 28, 1946. About August, 1944, as a non-commissioned officer in the United States Army, I was assigned to a highly-secret army project at Los Alamos, New Mexico which I later learned to be the atom bomb project.

About November 29, 1944, I traveled from Los Alamos to Albuquerque, New Mexico where I met my wife Ruth who had come from New York City to celebrate our wedding anniversary. On or about that date, while walking on Route US 66 toward the Rio Grande River in Albuquerque, my wife Ruth told me that my brother-in-law, Julius Rosenberg, who is married to my sister Ethel had asked Ruth to ask me to furnish information concerning the work I was doing at Los Alamos so that it could be furnished to the Soviet Government.

David Greenglass

Ruth told me that I was working on the atom bomb project. I was very surprised but told Ruth that I already knew I was working on the atom bomb. She said that my brother-in-law explained that we are at war with Germany and Japan and they are the enemy and that Soviet Russia is fighting the enemy and is therefore entitled to the information. Ruth told me that she did not like for me to get involved in this matter as she thought it would cause trouble. I told Ruth, however, that I would agree to give whatever information came to me in the course of my employment at Los Alamos on the atom bomb project.

I had a furlough from about December 30, 1944 to about January 20, 1945, which time I spent in New York City. While in New York City during that time I talked to Julius Rosenberg and Rosenberg described to me generally how the atom bomb functions. I later learned through my employment at Los Alamos that the bomb which Rosenberg had described to me at that time was the naval type atom bomb which was later dropped on Hiroshima about August, 1945. This same meeting with Julius Rosenberg in January, 1945, I furnished Rosenberg with a list of names of persons employed at Los Alamos to be ideologically suited for recruitment to furnish information on the atom bomb for the Russians.

It may have been during the above-mentioned furlough in 1945 or possibly during a furlough about September, 1945, an incident occurred:

One night, while I was in New York City, I was talking to my brother-in-law, Julius Rosenberg, about the Los Alamos atom bomb project, my brother-in-law, J.

me. I borrowed an automobile, drove to the vicinity of about First Avenue, somewhere between East 42nd Street and East 59th Street in New York City, and parked the car at the curb on a north-bound street facing north. Julius Rosenberg walked over to the car and told me to wait. Then he walked away and came back with a man and introduced him to me by first name which I do not recall. The man got into the car and Julius Rosenberg walked away. I drove the car around in New York City for about 15 minutes while the man asked me questions about a high explosive lens which was being experimented with at the Los Alamos atom bomb project at that time. I tried to describe the lens to the man while I was driving but was unable to furnish him with a great deal of information concerning it because I was concentrating on the driving. After I let the man out of the car I never saw nor heard of him again. At the end of my furlough time I returned to my assignment at Los Alamos.

About February, 1945, my wife Ruth moved to Albuquerque, New Mexico. She said she had been told by Julius Rosenberg that Anne would come to Albuquerque, New Mexico and would meet me at a store on Central Avenue in Albuquerque, at which time a meeting was made for a meeting to pick up information to be furnished about the atom bomb. As I recall, Anne was supposed to come in the latter part of May and Ruth was to walk in from Los Alamos at that time on three different consecutive days until the meeting was made. This meeting, however, never occurred.

About June, 1945 a man came to the apartment where my wife Ruth was living at 209 North High Street, Albuquerque, New Mexico. He had with him a torn piece of cardboard which matched a torn piece of cardboard I had been furnished as a means of identifying the person to whom I was to furnish information concerning the atomic bomb. I am unable to recall at this time whether my half of the torn cardboard was furnished to me by Julius Rosenberg during my January, 1945 furlough in New York City or whether Rosenberg had given it to my wife Ruth to give to me when she moved to Albuquerque in February, 1945. This man who had the proper identification, I believe, introduced himself to me as Dave, although I am not certain of the name he used; however, I later recognized this man's pictures in various newspapers as being Harry Gold. At the time Gold came to me in Albuquerque in June, 1945 I furnished him with a list of names of persons employed at the Los Alamos atom bomb project whom I thought might be ideologically suited for recruitment to furnish information to the Russians concerning the atom bomb and I also gave him a sketch of a high explosive lens mold which was an experiment to study implosion effects on a steel tube to understand the effect it would have on uranium that it could be determined how a critical mass could be arrived at which would not explode before detonation. I also furnished Gold with information concerning the identity of a world-famous scientist who was working at Los Alamos under an assumed name and also furnished information that Oppenheimer and Serber were working at Los Alamos. Gold told me that I was living in a good place and said I could probably use some money. I answered that

David

some money. Gold then gave me an envelope containing \$500 in currency. Gold said that he would come back to see me again and I agreed to see him but he never contacted me again. My wife Ruth also met Gold at that time.

I had a furlough from Los Alamos about September, 1945, which I spent in New York City. Almost as soon as I got to New York City ~~I got in touch with Julius Rosenberg~~ ^{got in touch with me and I} ~~met him on the street somewhere in the city.~~ ^{met him on the street somewhere in the city.} At that time I furnished Julius Rosenberg with an unscaled envelope containing the information I had been able to gather concerning the atomic bomb, as well as a couple of sketches of the molds which make up the atom bomb. To the best of my recollection, the information I furnished Rosenberg concerning the atom bomb at that time is substantially as follows:

The atomic bomb is made up of 36 pentagonal-shaped molds. When all set together, the molds form a sphere made of a high explosive, with a ball of plutonium in the center. Inside the plutonium is a sphere of beryllium. A plastic shield is in between the plutonium and the high explosive. The high explosive has two detonators for each high explosive segment. The detonators are connected to a number of condensers, possibly about 36 or 72. The condensers are also called capacitators. The number of detonators is twice the number of molds and the number of condensers is equal in number to the number of molds. The beryllium has a hollow center. The beryllium has a number of holes in it. The apex of each cone is toward the periphery of the sphere. The beryllium is gold-plated which prevents it from emitting neutrons. The detonation of the high explosive causes the plutonium to be crushed.

David Greenglass

and therefore increases the number of plutonium neutrons which are free. The beryllium also becomes imploded and the beryllium neutrons are jettied out through the cones into the mass of plutonium which sets off the chain reaction of the plutonium which results in an atomic explosion.

I do not know whether Rosenberg read the above information or what disposition he made of it. He did not give me any money for the information at that time. The war was over at that time and I was hoping to be discharged from the army in the near future. Rosenberg at that time attempted to persuade me to continue my employment at the Los Alamos atom bomb project in a civilian capacity after such time as I should be discharged from the army. I declined to follow this advice, inasmuch as I desired to return to my home in New York City.

Shortly after my discharge from the army February 28, 1946, I returned to my home in New York City and after a few months became associated in business with Julius Rosenberg. He and I ^{and others} ~~were both~~ partners in the G & R Engineering Company, New York City, in 1946, and continued that arrangement when that company was taken over by the Pitt Machine Products Company, Incorporated, New York City. I severed my relations with the latter company in 1947. During my association with Julius Rosenberg in business from 1946 to 1947 I learned through conversations with him that he has been extensively engaged in Soviet espionage. He has since my discharge attempted to persuade me to become a student of nuclear physics at the Massachusetts Institute of Technology to be financed by him and the GI Bill of Rights in order

contacts in the field of nuclear physics to obtain information for the Soviet Government. He also on one occasion attempted to persuade me to become a student at the University of Chicago at ^{RUSSIAN A.S.} his expense because several of the persons there previously worked on the Los Alamos atom bomb project.

Periodically, since I was discharged from the army, I have borrowed sums of money from Julius Rosenberg in different amounts up to \$200 each which probably totals about \$1,000. On each occasion, Rosenberg would tell me that he would have to borrow the money from someone else to let me have it. I believe he made these loans to me without expecting repayment because of the knowledge I had of his Soviet espionage activities.

About February, 1950, when Klaus Fuchs was arrested in England, Rosenberg came to me and said that I would have to leave the country because FUCHS' arrest would lead directly to Gold. I declined, however, to leave the United States. When Harry Gold was arrested, Julius Rosenberg came to me and pointed to Gold's picture in the paper and said that this is the man who contacted me in Albuquerque and that I would have to leave the country. He said that more important persons than I have left the country. He gave me \$500 for expenses to get out of the United States. I told him that this was not enough money for me to leave because I had numerous debts to pay. A few days later, Julius Rosenberg again came to my home and gave me \$4,000 in twenty-dollar bills to leave the country. I believe that day was Sunday, May 28, 1950. I indicated to Julius that I would leave the country and he said I should leave any after June 11, 1950. Julius gave me the following instructions as to what I should do in this regard. I was to go to Mexico City by train with my

David Greenglass

There I was to rent a house and write a letter to the Soviet Embassy at Mexico City. In the letter, I was to mention something about the United Nations. I was then to wait three days at which time I would go to the Plaza de la (something or other) and stand in front of a statue of Christopher Columbus at 5:00 p.m. with my thumb in a Mexico City street guide. A man would then come to me and say have you ever seen such a statue before. I was to answer no, that I have lived in Oklahoma all my life. He was to say there is a much better statue in Paris. The man would then give me passports and money for a trip to either Stockholm, Sweden, or Berne, Switzerland, where I was to repeat the same procedure and if I were to go to Stockholm I would stand in front of a statue of Linneaus, at which time I would receive the necessary papers to continue my trip to Czechoslovakia where I was to write to the Soviet Ambassador to merely state, "I am here."

My wife and I decided not to leave the country but wanted to give Rosenberg the impression that we intended to leave. We decided to go to the mountains in upstate New York and stay there until Rosenberg left the country as he indicated he would do. We planned to return to New York City after we had learned of Rosenberg's departure.

I have read the above statement contained in this page and seven preceding pages, to the best of my knowledge.

David E.

July 19, 1950

I, Walter Koshi make the following voluntary statements. I arrived at Los Alamos in Jan 1944 and was assigned to study cylindrical implosions. During this period it was desirable to investigate the feasibility of producing a symmetrical implosion. It was believed that this probably could be attained by using the so called explosive lens which was a combination of slow and fast explosives so formed and arranged that if the appropriate points were initiated a cylindrically symmetrical detonation wave would result. The object then was to permit this detonation wave to impinge on everywhere simultaneously on a metal cylinder and then to measure photographically the perimetre of the inside of this cylinder as it collapsed.

I have examined a photostatic copy of a sketch bearing the signature David Greer June 15, 1950. This sketch is a reasonable description of the high explosive system and metal cylinder that I used in the above mentioned experiments.

Walter Koshi
July 19, 1950

This experiment was designed to investigate the shape of the high explosive components and the velocities that they should ~~you~~ have to give a symmetrical explosion. These studies then could be carried over to the high explosive components of the atomic bomb where a symmetrical explosion is necessary.

In view of the intimate connection between this experiment and the atomic bomb design this work was classified as "Secret" at Los Alamos.

Justice, to conduct a complete search of A TOOLCHEST IN MY POSSESSION
~~my residence located at~~

THE OFFICE OF THE ARMA CORPORATION, 254 36th St, Brooklyn
on 7/25/50

These agents are authorized by me to take from my residence any
letters, papers, materials or other property which they may desire.

This written permission is being given by me to the
above named Special Agents voluntarily and without threats or
promises of any kind.

(SIGNED)

Ruth Greenglass

WITNESSES:

James P. Lee, Sp. Agt. F.B.I. W.Y.C. 7/25/50
Martin F. Carey, S.A. FBI,

New York, New York

July 17, 1950

I, David Greenglass, make the following statement to John W. Lewis and Leo H. Frutkin who have identified themselves to me as Special Agents of the Federal Bureau of Investigation. I make this statement freely and voluntarily and I have been advised of my right not to make a statement. I have also been advised of my right to an attorney. No promises or threats have been made to me to get me to make this statement. I understand that this statement may be used against me in a court of law.

I was born March 3, 1922 at New York City and my home is now at 265 Rivington Street, New York City, New York. I was inducted into the United States Army April 12, 1943 and was given Army Serial Number 32882473 and was discharged from the army February 28, 1946. About August, 1944, as a non-commissioned officer in the United States Army, I was assigned to a highly-secret army project at Los Alamos, New Mexico, which I later learned to be the atom bomb project.

About November 29, 1944, I traveled from Los Alamos to Albuquerque, New Mexico, where I met my wife Ruth who had come from New York City to celebrate our wedding anniversary. On or about that date, while walking on Route US 66 toward the Rio Grande River in Albuquerque, my wife Ruth told me that my brother-in-law, Julius Rosenberg, who is married to my sister Ethel, had asked Ruth to ask me to furnish information concerning the work I was doing at Los Alamos so that it could be furnished to the Soviet Government.

David Greenglass

Ruth told me that I was working on the atom bomb project. I was very surprised but told Ruth that I already knew I was working on the atom bomb. She said that my brother-in-law explained that we are at war with Germany and Japan and they are the enemy and that Soviet Russia is fighting the enemy and is therefore entitled to the information. Ruth told me that she did not like for me to get involved in this matter as she thought it would cause trouble. I told Ruth, however, that I would agree to give whatever information came to me in the course of my employment at Los Alamos on the atom bomb project.

I had a furlough from about December 30, 1944 to about January 20, 1945, which time I spent in New York City. While in New York City during that time I talked to Julius Rosenberg and Rosenberg described to me generally how the atom bomb functions. I later learned through my employment at Los Alamos that the bomb which Rosenberg had described to me at that time was the naval type atom bomb which was later dropped on Hiroshima about August, 1945. During this same meeting with Julius Rosenberg in January, 1945, I furnished Julius Rosenberg with a list of names of persons employed at Los Alamos whom I believed to be ideologically suited for recruitment to furnish information concerning the atom bomb for the Russians.

It may have been during the above-mentioned furlough in January, 1945 or possibly during a furlough about September, 1945 that the following incident occurred:

One night, while I was in New York City on furlough from the Los Alamos atom bomb project, my brother-in-law, Julius Rosenberg, asked to see

David Greenglass

me. I borrowed an automobile, drove to the vicinity of about First Avenue, somewhere between East 42nd Street and East 59th Street in New York City, and parked the car at the curb on a north-bound street facing north. Julius Rosenberg walked over to the car and told me to wait. Then he walked away and came back with a man and introduced him to me by first name which I do not recall. The man got into the car and Julius Rosenberg walked away. I drove the car around in New York City for about 15 minutes while the man asked me questions about a high explosive lens which was being experimented with at the Los Alamos atom bomb project at that time. I tried to describe the lens to the man while I was driving but was unable to furnish him with a great deal of information concerning it because I was concentrating on the driving. After I let the man out of the car I never saw nor heard of him again. At the end of my furlough time I returned to my assignment at Los Alamos.

About February, 1945, my wife Ruth moved to Albuquerque, New Mexico. She said she had been told by Julius Rosenberg that a woman named Anne would come to Albuquerque, New Mexico, and would meet Ruth in front of a store on Central Avenue in Albuquerque, at which time arrangements would be made for a meeting to pick up information to be furnished by me concerning the atom bomb. As I recall, Anne was supposed to come to Albuquerque about the middle of May and Ruth was to walk in front of the store at a certain time on different consecutive days until the meeting with Anne should have taken place. This meeting, however, never occurred.

David Greenglass

About June, 1945, a man came to the apartment where my wife Ruth was living at 209 North High Street, Albuquerque, New Mexico. He had with him a torn piece of cardboard which matched a torn piece of cardboard I had been furnished as a means of identifying the person to whom I was to furnish information concerning the atomic bomb. I am unable to recall at this time whether my half of the torn cardboard was furnished to me by Julius Rosenberg during my January, 1945 furlough in New York City or whether Rosenberg had given it to my wife Ruth to give to me when she moved to Albuquerque in February, 1945. This man who had the proper identification, I believe, introduced himself to me as Dave, although I am not certain of the name he used; however, I later recognized this man's pictures in various newspapers as being Harry Gold. At the time Gold came to me in Albuquerque in June, 1945, I furnished him with a list of names of persons employed at the Los Alamos atom bomb project whom I thought might be ideologically suited for recruitment to furnish information to the Russians concerning the atom bomb and I also gave him a sketch of a high explosive lens mold which was an experiment to study implosion effects on a steel tube to understand the effect it would have on uranium so that it could be determined how a critical mass could be arrived at which would not explode before detonation. I also furnished Gold with information concerning the identity of a world-famous scientist who was working at Los Alamos under an assumed name and also furnished information that Oppenheimer and Kistiakowsky were working at Los Alamos. Gold told me that I was living in a rather poor neighborhood and said I could probably use some money. I answered that I could use

David Greenglass

some money. Gold then gave me an envelope containing \$500 in currency. Gold said that he would come back to see me again and I agreed to see him but he never contacted me again. My wife Ruth also met Gold at that time.

I had a furlough from Los Alamos about September, 1945, which I spent in New York City. Almost as soon as I got to New York City ~~I got in~~ ^{got in touch with me and I} *D.S.* touch with Julius Rosenberg ~~and~~ met him on the street somewhere in the city. At that time I furnished Julius Rosenberg with an unsealed envelope containing the information I had been able to gather concerning the atomic bomb, as well as a couple of sketches of the molds which make up the atom bomb. To the best of my recollection, the information I furnished Rosenberg concerning the atom bomb at that time is substantially as follows:

The atomic bomb is made up of 36 pentagonal-shaped molds. When all set together, the molds form a sphere made of a high explosive, with a ball of plutonium in the center. Inside the plutonium is a sphere of beryllium. A *BARITUM* elastic shield is in between the plutonium and the high explosive. The high explosive has two detonators for each high explosive segment. The detonators are connected to a number of condensers, possibly about 36 or 72. The condensers are also called capacitators. The number of detonators is twice the number of molds and the number of condensers is equal in number to the detonators. Beryllium has a hollow center. The beryllium has a number of cone-shaped segments. The apex of each cone is toward the periphery of the beryllium. Beryllium is gold-plated which prevents it from emitting neutrons. The action of the high explosive causes the plutonium to be crushed or imploded

David Greenglass

and therefore increases the number of plutonium neutrons which are free. The beryllium also becomes imploded and the beryllium neutrons are jettied out through the cones into the mass of plutonium which sets off the chain reaction of the plutonium which results in an atomic explosion.

I do not know whether Rosenberg read the above information or what disposition he made of it. He did not give me any money for the information at that time. The war was over at that time and I was hoping to be discharged from the army in the near future. Rosenberg at that time attempted to persuade me to continue my employment at the Los Alamos atom bomb project in a civilian capacity after such time as I should be discharged from the army. I declined to follow this advice, inasmuch as I desired to return to my home in New York City.

Shortly after my discharge from the army February 28, 1946, I returned to my home in New York City and after a few months became associated in business with Julius Rosenberg. He and I ^{and others D.S.} were both partners in the G & R Engineering Company, New York City, in 1946, and continued that arrangement when that company was taken over by the Pitt Machine Products Company, Incorporated, New York City. I severed my relations with the latter company in September, 1949. During my association with Julius Rosenberg in business from 1946 to 1949, I learned through conversations with him that he has been extensively engaged in espionage. He has told me that he has contacts with scientists or workers in Cleveland, Ohio, and in upstate New York, I believe at Syracuse, Albany, Buffalo, and Schenectady. He also told me that usually, where he had contact who is a scientist working at some plant or laboratory doing

David H. Glass

secret work, that he also has a contact with a technician or some insignificant person ^{D.S.} ~~working at the same plant~~ who makes microfilm of the information furnished by the scientist. This microfilm is then taken to some movie theater in New York ^{by JULIUS ROSENBERG D.S.} where it is hidden in some obscure place ~~by the contact~~ and is shortly thereafter picked up by Rosenberg ^{D.S.} ~~for transmission to the Russians.~~ He has told me that in some instances his contacts furnish him the information before it is microfilmed and in those cases, Rosenberg himself makes up the microfilm. For this purpose, he has a leica camera and also has two apartments having no tenants where he does the photographic work. One of these apartments is located in the vicinity of 12th Street and Avenue B in New York City and is a furnished apartment. The other is located somewhere in Greenwich Village, New York. I do not know whether he has rented both of the above apartments at the same time. He offered to let me use the apartment at 12th Street and Avenue B for living quarters when I was discharged from the army in February, 1946; how

^{RUSSIAN} ~~and so did not see the apartment.~~ Rosenberg has told me that any of his ^{RUSSIAN} ~~espionage contacts~~ ^{PERSONS} ~~in person~~ that arrangements get him somewhere on Long Island and that on those occasions elude any surveillance that is being conducted on him.

He that he knows about a sky platform the United States in upstate New York. He explained that this project where the mathematics are being worked out and it would a point in space where gravity ceases to exist, perhaps

David Greenglass

about 5,000 miles from the earth. He also told me that he knows of work being done on atomic energy in connection with its use in producing power for airplanes. He has mentioned a contact in upstate New York who is working on jet airplanes. He has since my discharge attempted to persuade me to become a student of nuclear physics at the Massachusetts Institute of Technology to be financed by him and the GI Bill of Rights in order that I could make contacts in the field of nuclear physics to obtain information for the Soviet Government. He also on one occasion attempted to persuade me to become a student at the University of Chicago at ^{ROSENBERG D.S.} his expense because several of the persons there previously worked on the Los Alamos atom bomb project. He has also told me that he ^{is known to D.S.} knows Elizabeth Bentley and Jacob Golos. Rosenberg was under the impression that he had introduced me to Harry Gold; however, that is a mistake. Rosenberg has told me that the Russians are very weak in electronics and radio tubes and any information in that regard is very valuable to them. Julius Rosenberg also once told me that he took the whole proximity fuse from Emerson Electric Company in a briefcase while Rosenberg was employed and that the proximity fuse was a highly secret invention at that time. The person named Anne, mentioned above, who was supposed to have a daughter Ruth in Albuquerque, New Mexico, is married to ^{AL D.S.} ex-living-with Mike, whose name I cannot recall. I do not know whether I ever met Anne but I have no impression of having met her once at the home of Julius Rosenberg. Mike attended Brooklyn Polytechnic Institute, Brooklyn, New York, ^{1940 D.S.} and I believe that he was a freshman at that time.

David Greenglass

time in the day school and probably went on to graduate as I understand he is now a graduate engineer. About the summer of 1948, Mike came to the Pitt Machine Products Company, Inc., and asked to see Julius Rosenberg who was not there at the time. He told me I believe that he was then working at some establishment in Ohio which I believe may be Gibbs and Cox in Cleveland, Ohio. Mike is described as follows: age, about 32 years; height, 5'8"-5'9"; weight, 185-190 lbs.; build, heavy, muscular, solid; hair, black, bald in center; round head, muscular jaws, smokes pipe and talks with pipe in mouth, ruddy complexion, good teeth; nationality, born in United States, of Russian or Ukrainian ancestry; heavy beard, *but smooth shaven. D. S.*

Through conversation with Julius Rosenberg, I ^{got the impression D. S.} ~~have learned~~ that the man who previously rented the apartment at 10 Monroe Street, New York City, now occupied by Rosenberg, was an engineer also engaged in Soviet espionage and it was through this medium that Rosenberg was able to get the apartment.

This man ^{to live D. S.} New York City ostensibly to go to the West Coast but instead went

Rosenberg also told me that a number of the scientists who attended the ~~Scientific~~ and Scientific Meeting at the Waldorf-Astoria Hotel in New York City in 1946, were contacts of Rosenberg. Rosenberg also told me that one of the contacts is a man who flew to Egypt as a \$200-a-day command project. This trip was made in the summertime 1946 to 1949.

Since I was discharged from the army, I have borrowed from Rosenberg in different amounts up to \$200 each which

David Greenglass

probably totals about \$1,000. On each occasion, Rosenberg would tell me that he would have to borrow the money from someone else to let me have it. I regarded each of these ^{as D.S.} loans ~~as a sort of blackmail~~ ^{but D.S.} because of my knowledge of Rosenberg's Soviet espionage activities, and I believe that Rosenberg ^{D.S.} also regarded them as ^{D.S.} such blackmail. ^{D.S.}

About February, 1950, when Klaus Fuchs was arrested in England, Rosenberg came to me and said that I would have to leave the country because Fuchs' arrest would lead directly to Gold. I declined, however, to leave the United States. When Harry Gold was arrested, Julius Rosenberg came to me and pointed to Gold's picture in the paper and said that this is the man who contacted me in Albuquerque and that I would have to leave the country. He said that more important persons than I have left the country already and that Joel Barr had left the United States ^{before D.S.} when Fuchs was arrested and is doing work for the Russians overseas. He gave me ^{\$1000.00 D.S.} \$500 for expenses to get out of the United States. I told him that this was not enough money for me to leave because I had numerous debts to pay. A few days later, Julius Rosenberg again came to my home and gave me \$4,000 in twenty-dollar bills to leave the country. I believe that day was Sunday, May 28, 1950. I indicated to Julius that I would leave the country and he said I should leave any time after June 11, 1950.

He gave me the following instructions as to what I should do in this regard. I was to go to Mexico City by train with my family. There I was to rent a house and write a letter to the Soviet Embassy at Mexico City. In the letter, I was to mention something about the United Nations. I was then to wait three days,

David Greenglass

at which time I would go to the Plaza De La (something or other) and stand in front of a statue of Christopher Columbus at 5:00 p.m. with my thumb in a Mexico City street guide. A man would then come to me and say have you ever seen such a statue before. I was to answer no, that I have lived in Oklahoma all my life, ^{HE WAS TO SAY D.B. MUCH BETTER D.S.} but there is a nicer statue in Paris. The man would then give me ^{D.B. D.S.} a passport and money for a trip to either Stockholm, Sweden, or to ^{BERNE} Switzerland, where I was to repeat the same procedure and if I were to go to Stockholm I would stand in front of a statue of Linneaus, at which time I would receive the necessary papers to continue my trip to Czechoslovakia where I was to write to the Soviet Ambassador to merely state "I am here."

Julius Rosenberg also told me that some of the Soviet espionage agents are not Russians but are in the diplomatic service of friendly nations, that is nations that are not behind the iron curtain.

My wife and I decided not to leave the country but wanted to give Rosenberg the impression that we intended to leave. We decided to go to the mountains in upstate New York and stay there until Rosenberg left the country as he indicated he would do. We planned to return to New York City after we had learned of Rosenberg's departure. I assume that Rosenberg has not departed from the United States because he is under surveillance by the Federal Bureau of Investigation.

I have read the above statement of this page and ten preceding pages. At the best of my knowledge.
